No, not living life this way

Would never be the same

So when there's room for you I'll search

Just wait for me

Wait for me..

I'll search to find where you have been

See everything you've seen

To understand and find where you'll be now

I'm counting every day

With each one less away

From the moment I \*find\* you

Alive at last.

[Chorus]

And so stay, inside

And watch the Winter sky pour rain over the fire

You're safer if I try

To keep the flames away from all that I ignite.

No...

Cause' I've burnt bridges where I've been

If you've followed me, you've seen

So I can only hope that you've been further on

But the fire's \*dying\* down

With the ashes comes the sound- Of you

Saying it's true.

[Chorus]

And so stay, inside

And watch the Winter sky pour rain over the fire

(No) You're safer if I try

To keep the flames away from all that I ignite.

No...

No... No... No... Ohhohh.

[Chorus]

So stay, inside

And watch the Winter sky pour rain over the fire Oh-Oh

You're safer if I try Oh-Oh

To keep the flames away from all that I ignite.

And so stay, inside, and just stay inside

And so stay, inside, and just stay inside

Cause' I've been West of you Oh-Oh

Ohh, but I'll be landing soon Oh-Oh

I travelled East from you Oh-Oh

But I'll be landing soon, yeah Ohhhhh

So stay, inside, ohh.
