

## **In Flames "Colony"**

Visit "[Colony](#)" on [MotoLyrics.com](https://MotoLyrics.com)

It's your world, the day is a threat  
In my world, there is an absence of light  
Genetic superior cell  
Controlled by the fathomless and unbearable

A radical new form  
Of plastic and rage  
Biologically optimized  
But with a strangling pulse

And your world, do you find me worthy?  
In my world, I parachute my life  
A virtual drugstore  
Populated by the fathomless and unbearable

Machine, meat and blood  
In an intimate relationship  
The new, superior  
More effective than all the preceding

When we can no longer cry  
Reality is torn  
Then it's easy to forget  
That the responsibility lies on us all

When we can no longer cry  
Reality is torn  
Then it's easy to forget  
That the responsibility lies on us all

I reach your world, the night is no threat at all  
Darkness transforms to a vision of hell  
Populated by the fathomless, unbearable
