Remind me  
I'm golden  
The fortress above the sun

Why don't you spend nowhere with me  
Follow the river and the path of the ones  
Write our names on the shore  
Forever - I can't find  
Struggling in a world undefined  
Decide how you want it to be  
I'm not eternity

Fly into the distant  
Disappear for a while  
I can't make sense of this  
But we're here today (feeling) alive

It starts to fall apart  
Let me take control

Reminisce  
The days and nothing more  
Something I will find again  
Deliver us

Can't hear the words you say  
But it doesn't really matter  
I give the world to you  
If you just...

Fly into the distant  
Disappear for a while  
I can't make sense of this  
But we're here today (feeling) alive

Fly into the distant  
Disappear for a while  
I can't make sense of this  
But we're here today alive
