I still need you  
When I'm in this pathetic state  
But you would detest me even more  
And I would burn even harder  
I would burn  
Burn away from you  
Nothing good ever came from you  
You only brought me down  
Nothing good ever came from you  
Will I ever be the same?  
And I still need you here by my side  
Now that I'm in this pathetic state  
But you would detest me even more  
And I would burn even harder...
