The stars are out tonight
There's no going back
The head straight ahead
Darkened skies painted black

If I could face the pain
And if you would feel the same
Listen a hole in a heart
Screams out for your name

You won't get touched
If you can't feel
And if I speak
No one will hear
You won't get touched
If you can't feel
Entity is lost
No love will heal

Have we lost direction
Where has innocence gone
Disappeared dissolute
No bewail, no mourn

If I could face the pain
And if you would feel the same
Listen a hole in a heart
Screams out for your name

You won't get touched
If you can't feel
And if I speak
No one will hear
You won't get touched
If you can't feel
Entity is lost
No love will heal
