Watch as we stomp your dome into the concrete  
How will you talk shit with your mouth sewn shut  
I donâ€™t think that you can say you know me  
Based on all the little things  
Youâ€™ve seen, you donâ€™t know shit  
If your band has something to say  
Come and say it to our face  
But be ready to back it up  
I think we should take this outside  
And finally finish this once and for all  
Iâ€™m so fucking sick and tired  
Of all these assholes wanna slander our name  
And think it goes unheard  
Youâ€™re all as good as fucking dead to me  
Sometimes I want to carve my fucking eyes out  
Instead Iâ€™ll take my rage out on you  
And when everythingâ€™s dead  
You will know I am through  
Fuck you, fucking trick  
All I wanna do is slit your throat  
And ripe out your eyes  
Someday you will pay, for everything youâ€™ve done  
This will be the end of you
