

In This Moment "Just Drive"

Visit "[Just Drive](#)" on MotoLyrics.com

Tonight is the night let's get ready to go,
Leave your bags behind and let's hit the road.
Tonight is the night, there's no time to loose, let's get
going.

Tonight is the night let's follow the moon.
You can take the wheel and I'll breathe the wind.
With my head back and hands in the air I am flying,
Just drive.

Take me away tonight, just me with you tonight.
Down the winding road, we will not let go.
We will drive no matter how far.
Yes we will drive until the ending of it all.

So here we are we left the world behind.
You've got your foot on the gas and it's do or die,
And these wheels are all we need as were cruising.
So here we are in this Cadillac.
We've got the rag top down and the seats are back.
You turn to me and say baby we're flying.
Just drive.

Take me away tonight, just me with you tonight.
Down the winding road, we will not let go.
We will drive no matter how far.
Yes we will drive until the ending of it all.
