I felt you breathe from across the room
Intoxicated by the way you moved
Let's disappear
Baby together we can disappear

Sit back relax and watch the blues collide
The same desire inside a new design

All my life I've never felt so alive
I've got so much on my mind nothing I would try to put
to tune
Or keep in time
Where the ocean meets the sky dressed in lights
But I can barely see your eyes in the moonlight

Sit back relax and watch the blues collide
The same desire inside a new design

All my life I've never felt so alive
I've got so much on my mind nothing I would try to put
to tune
Sit back relax and put the car in drive
We'll use the headlights as our guides
We'll sleep under the stars tonight
Sit back relax and watch them shine

Backs break with the waves
Backs break with the waves
Backs break with the waves tonight

All my life I've never felt so alive
I've got so much on my mind nothing I would try to put
to tune
Sit back relax and put the car in drive
We'll use the headlights as our guides
We'll sleep under the stars tonight
Sit back relax and watch them shine
Sit back relax and watch them shine
Sit back relax and watch them shine
