You see it getting down  
You feel it makes you high  
You taste it, it is fine  
But now you feel fucked up  
Illusional lights shine  
And multiply again  
Delusional sounds belt  
In your ears again

White walls, plastic pipes  
Green masks, cyber eyes

Fleshless world now is around you

So cold aura now surrounds you  
Distorted virtual objects everywhere  
Synthetic snow

So much pressure  
And despair all over  
This weird sense  
Of insanity  
Alone in the void  
Everything is hostile  
Lancinating sights  
Full of humanity

It's burning within my soul
