"But Not For Me"

Visit "[But Not For Me](#)" on MotoLyrics.com

Shake their heads and feel sad
They don't understand how we can be so fucking mad!
Handed down thru the years
Ignorance hate and fear
You never ever questioned WHY
But we don't want to live a lie
And will they ever understand?
That we don't want the bomb
Progress 'til the earth is gone
To have our lives run by greed

manufactured hate and needs
And will they ever understand?
That we don't want what they give
When it means giving in
Please let us decide
how we want to live and die
And will they ever understand?
That we don't...
Or see color...
We just want to be ourselves
and put the bullshit up on the shelf!
