Take a bow
Got better
Wash 'em out with burning lies
Did it all to instigate
That's your personality

Still attracting me
Fast asleep but dreaming of your face
Enjoyment from the chemical
Comfort all America

Come one, come all
Into 1984
Yeah, three, two, one
Lights Camera Transaction

Quick, your time is almost up
All forget that there is more
Edging in towards the flame
Burn into obscurity

Still attracting me
Fast asleep but dreaming of your face
And judging from the guard that looms
Comfort all America

Come one, come all
Into 1984
Yeah, three, two, one
Lights Camera Transaction

The Foundation is caving in
All that should be worn with pride
I hate to say
There's so much more
There's so much more
And You found Your heart
