"Victims Of A Callous Society"

survivors of systematic persecution continue to suffer
like cowards society turns away
it doesn't involve us so we don't care
driven from their homes by ethnic cleansing
to defend and set free we must prepare
the innocent are the ones who suffer
not the politicians who lead the debate
the innocent die
the politicians argue
they send out more armies to maintain the hate
abandon and ignore

the feud begins anew
rescue the victims of this holocaust
who blindly fight for pseudo-martial rights.
