Time to feel good without you
I'm your last breath
Why do I die without you
You're any last breath
Pushing again pushing again
The bluer the eyes the bluer the skin

Just looking over reasons
Why certain eyes are seeing
We can't stop pushing razors
It might affect the bleeding

You're certain with this option
Once we start there's no stopping
I'll film the perfect flavor
For people who like watching

Pulling the skin testing the sin
Opening lies pushing it in

Thanking you again for nothing
I hate you again for nothing
