I know
Oh, Oh Yeah

Hey baby
Why you rushing
Let's sit back and watch the flowers grow
Why you want
To swim against the tide
Let's lay and watch the river flow

Here in god's creation
There is always a reason
I know, that love is there for us
Yeah

Chorus
Where we'll go, baby I don't know
Maybe we should just let nature run the show
Where we'll go, baby I don't know
Maybe we should just let nature run the show

I don't wanna watch no movie
Let's sit and watch the stars put on a show
If you want to win my favor
Be creative, and show me your flavor
Cause here in god's creation
For everything there is a session
Let go Let life
Let love let god

Chorus
Where we'll go, baby I don't know
Maybe we should just let nature run the show
Where we'll go, baby I don't know
Maybe we should just let nature run the show

Like the sun shines and
The wind blows
Like the birds fly
And the moon glows
If I am meant for you and

You are meant for me
Then we will flow together
Everlastly

Chorus x2

Where we'll go, baby I don't know
Maybe we should just let nature run the show
Where we'll go, baby I don't know
Maybe we should just let nature run the show

Baby we should sit, watch the flowers grow
Baby we should sit, back and watch the moon glow
Baby, we should feel the wind blow

First you plant a seed
And then it grows and
Then it blooms
And it dies
That the cycle of life
Same goods for you and I
Maybe this time we'll get it right

Go with the flow
Maybe we'll get it right..
