i'm hearing us nearing
what you're feeling is mirrors pulling blind
our thoughts keep what we need
inside the slideshows of our lives
we warned you all
embrace the fall
without assistance from the wall

we live in the weak and the wounded
live in the weak and the wounded!
live in the weak and the wounded! (2x)

we arrived thinking live
was just a color in our eyes
keep staring keep glaring
hair tearing with eternal lies

we warned you all
embrace the fall
without assistance from the wall

we live in the weak and the wounded
live in the weak and the wounded!
live in the weak and the wounded! (2x)

one day you'll see again
one day you'll live again

we live in the weak and the wounded
live in the weak and the wounded!
live in the weak and the wounded! (2x)
