Yeah, yeah  
Let my people go  
Let my people go

In the swamps of New Orleans  
The rain came pouring down  
So heavy was the water  
That the walls came crashing down

Now I know a survivor  
But how the hell you justify  
Leaving a hundred thousand  
People in water that high  
Just struggling for their lives?

I know there's got to be a better way  
I know there's got to be a better way  
I know there's got to be a better way  
And we've gotta find it

Stand up  
(We've gotta find it)  
Or fall down  
(We've gotta find it)

Politicians are screaming  
They say we've got a reason for war  
So many people are dying  
And we ain't even sure what for

Is it because he's a Muslim?  
Tell me is it democracy or is it the oath?  
It's on the news every day, one paycheck away  
And the President's on the golf course

I know there's got to be a better way  
I know there's got to be a better way  
I know there's got to be a better way  
And we've gotta find it

You got to stand together  
(We've gotta find it)

Or we could fall apart  
(We've gotta find it)  
We've gotta find it, yeah

Sweet buttered craw dad, delta bread  
Hot pepper soul, that's been sold out  
Lives that were taken before they found out  
What life was all about

He's a genius with the lyrics  
Started young sipping syrup  
And it hurts me to my soul  
The way he drinks away the pain  
The world's going to lose him  
Another young superhero

We've gotta find it  
We've gotta find it  
We've gotta find it  
We've gotta find it

We've gotta find it  
We've gotta find it  
We've gotta find it  
We've gotta find it

See the children on TV  
It's become a sign of the times  
Glorifying their bodies  
Something just don't feel right

Still we keep pretending  
That boys and girls are men and women  
We watch it and we call it entertainment  
And everything is okay  
As long as somebody's getting paid

I know there's got to be a better way  
I know there's got to be a better way  
Hey, there's got to be a better way

And we've gotta find it  
We've gotta find it  
We've gotta find it
