We're like the sun and the moon
We barely see each other
Though you're not near, you're light still shines for me
I know by now, why couldn't love another
Although it seems that you and I were never meant to
be
You're my destiny

CHORUS:

Little light for the love alive, captured in the dark
Only you can feel me, you can make me shine bright
I rely on the sun field
Touch me in the night

We're like the sun and the moon
A barely strong connection
Nothing changes, nothing ever will
You look at me only to see your own reflection
Without your shine there simply wouldn't be a trace of
me
I am never free (you're my destiny)

CHORUS x2

You bring me day light
At night, you shine through me

Oh I try hard to change the rules for night and day
The shadow seems to be the place for me

CHORUS x2
