

Infected Mushroom "Artillery"

Visit "[Artillery](#)" on MotoLyrics.com

The three dimensional professional projections are
strapped for light
Connected from selection, airtight
The isolated, the decisive, victory stimulated
The nonsimulated patterns of flight originated
Now I'm a carnivore on a tour of duty
My band of brothers and full metal jackets establish
cruelty
Black magic conjurer attack through the monitor
Destruction of assumption, one thing I can promise ya'

It halfcracked with cold shards of glass
Ritualistic annihilators that murder your cast
The future of the past, that last that feel
The seventh seal broken in half, ceremony is real

Become obsolete, highstrung from a beat
A strong minded individual delivering defeat
Blood rivers in the street, keep flowing or retreat
Deep omens keep opponents speech limited repeat

(whispered)

You're opening the door to the corridor stretching to
the left
There's hunger in those eyes to get this off my chest
I am just a man who wants revenge, and I confess
I am full of rage and sin
Locked inside this cage again
When evil reigns 'cuz people like to win
It may seem sweet, but we won't like the end
So we shine brightly from the light within

(rapped)

You're opening the doors to the corridors stretching to
the left
Anger within my eyes, but the truth is on my chest
I am just a man who wants revenge and I confess
I am full of rage and sin, locked inside this cage again
Where evil reigns and people like to win
It may seem sweet, but we won't like the end
So we shine brightly from the light within

Locked inside this cage again (x4)

Turn the music up a bit...

Yo, yo...

Dark secrets, demons with a conscience
I'm the Lone Ranger looking for Pocahontas
Teenage zombies flying the beat,
I'm dying to learn what I'm trying to be
Go Bad News Bears and the Dukes of Hazzard
The youth of my group is the truth, so have it.
Keep myself couped up, recoup quickly
Face still hurts but my kids stick with me
Death loved not far as we go,
Crazy face still not star of the show
I appreciate the chance to hurt, I'll kill you
Ice pick into your neck, I will do
anything
Talk to you like I might care
anything
Rippled by the nightmare, moonshine distillery
Back road to villiany
Military start I depart with artillery

With artillery (x14)

With Ta Ra Ta Ta Ta Ta...

Locked inside this cage again,
Locked inside this cage again,
Locked inside this cage again,
Locked inside this cage again...
