I wish to give, to take, to make, to check, I wanna see it  
happen

I want to see, to be, the one that plays the game  
without no fears and regrets

I want to know you, better than I know myself

I want to feel the end, and to enjoy the consequence

I'm playing the game

the one that will take me to my end

I'm waiting for the rain...

to wash who I am

(x2)

I want to move, to loose, to take the grooves, and to  
give it all back

I want to take the time rewind, and to kick it right from  
the start

to be unknown and all alone, lose the kind that are  
behind

to start a new play by myself and to give the best I have

I'm playing the game

the one that will take me to my end

I'm waiting for the rain

to wash up who I am

(x4)
