****English Translations****

Baby just can't let you go
Just can't let you go

I can't breathe anymore because you're not by my side
My heart is still beating like this
I still believe that it's not true (I believe so)
I will protect you (my mind will)
I can't turn back the time, but one more time

Baby just can't let you go
Even if I have everything, without you by my side
Everything will collapse
Just can't let you go
Even if I fall from exhaustion, if you become my wings
I can fly high into the sky

I can't turn back the time, but give me one more chance
I can't turn back the time, but turn back to me just once
You're not at my side
My love right now is a red sign
Even my rain of tears has stopped
My hands that used to fit so well with yours
They're above my knees now
I pray every night
I don't want to believe in tomorrow

Because I will still live in a pretend world in which you
will come back
Tomorrow

Baby just can't let you go
Even if I have everything, without you by my side
Everything will collapse
Just can't let you go
Even if I fall from exhaustion, if you become my wings
I can fly high into the sky

Baby just can't let you go
Just can't let you go

In my mind there's only you
Without you, the world is too cold
You're the only one I would put everything on the line
for
Just can't let you go
Even if I fall from exhaustion, if you become my wings
I can fly forever

Just can't let you go
My love right now is a red sign
Even my rain of tears has stopped
My hands that used to fit so well with yours
They're above my knees now
Just can't let you go
I pray every night
I don't want to believe in tomorrow

Because I will still live in a pretend world in which you
will come back
Tomorrow
