In the dawn and birth of this story  
Scientists proclaim a new discovery  
Funded by American government  
They found means of new warfare  
Bodies diseased reeking of death  
Injecting mutated bacteria  
Seeking destruction by a warfare of germs  
Create mass disposal of life  
Mass viral plague  
Syringe penetrates to the bone  
Society defaced by this parasite  
Condemned by a lifetime of pain  
Creation of virus causing death  
Thousands will die  
Relinquish control a plan to slowly kill  
Humanity falls prey to this disease  
Decomposition induced by plague  
Cherish the moments you have left  
Introducing a new wave of death  
It's toll will surely take your breath  
Inherit disease passed through the blood  
Suffer the pain and vomit the soul  
Vomit the soul  
Lives obscure a lifetime of deformity  
Amputate limbless stump  
Excruciating no one shall be spared from pain  
No one deserves to live this way
