Created with a great purpose
A grim scenario, reprogrammed to destroy
Out of control, autonomous, replication
Horrendously re - engineered nano machines devour
Fear the nanoscourge, nothing will remain
Life will be erased, no where left to run
A silver cloud grows, blanketing the sky
Fear the gray goo
Out of control, autonomous, mutation - self replication
Horrendously re - engineered nano machines devour
Doomsday device, bio virus, nano terrorism
Consuming all living matter
The engines of creation
Ecophage, consuming all
The earth will be reborn
Into a glowing metallic broth of
Self replicating nano machines
Remolding all matters in their own image
Engulfed in molecular mutations
Nanoscourge!
Engulfed in molecular mutations
