Astonishing evolution
Unnatural inheritance
The forfeiture of the earth
Reaching the human equivalent
Necessarily soaring past
Knowledge rivaling the emergence
Of human intelligence
Accelerating proliferation of information
Technology
Innervates society and
Begins to subsume matters into code
Man and machine converge
Submission eminent, denial
An army of non-living entity's
Become the master in seconds
Society has a new castle system
Humans are as a race tolerated
Are pitied by the machines
Spiritual mechanical conscious begins
Human kind passes the torch of supremacy
Hope for the future withers beings
Bitter we are as our creation rules
Self replication frenzy
Unrestrained creatures of a metal brood
Supercomputers power
The embodiment of a global brain
