Precisely emulated soft tissue and tendons
Devoid of emotions bio weapon
Conglomerate of implants - gargantuan
Wretch - cthulhu like
Tentacles capture
Not one drop of blood is wasted
An experiment gone totally awry
From it's original purpose
Artificial monstrosity
Terrorizing the poverty stricken countryside
Sucking bodies out of their shanties
Like marrow from bone
Sadly this is only the beginning
Of the pain that man must endure
In order to reach his destiny
