

The Butterfly Effect

"The Way"

Visit "[The Way](#)" on MotoLyrics.com

Close your eyes so you can't see
As you climb down with me
Take my hand don't walk alone
Where it stops I don't know

It's all right with me
Saviour insult

Those who suffer
Those who care
Those who linger
Anywhere at all

Take a minute
Discover
Why you need
No other

It's all right with me
Don't be selfish
Those who suffered
Those who cared
Those lingered
Anywhere at all

That's how it is
That's how it used to be
No one waiting there for me
That's how it is
That's how we used to be
That's how it was and always will be

The way we were
That's how we used to be
How it was and always will be
