Spread on wings of soaring dove  
Our love carried higher  
Lifted high in silent flight  
Never, ever tire

Love never ending  
Love never fading  
True love ascending  
Promises made in  
Truth, dedication  
Hope and devotion  
Now we are slipping  
Into the endless night

Love like ours will find a way  
To live on forever  
Time will test,  
But come what may  
We will be together

You had always been my love  
We were childhood sweethearts  
Life had blessed us from the start  
Then it tore us apart

Love never ending  
Love never fading  
True love ascending  
Promises made in  
Truth, dedication  
Hope and devotion  
Now we are slipping  
Into the endless night
