Believe in me for everything i was doing was right for
you
and everything here resembles the reasons why i
escaped for you.
We are in peace.
They will go and die in peace.
These feelings have knocked me cold,
These feelings have knocked me cold.
But where now'Where to hide?
But where now? Where to hide?
Come leave with me to walk through the desert, soak
up all oracle.
And we will combine because you're my one and only
miracle.
We are in pieces,
They will go and die in peace.
These feelings have knocked me cold,
These feelings have knocked me cold.
But where now'Where to hide?
but where now'Where to hide?
You will never know.

You will never know how much pain and hurt, there is
burning inside my flesh.
You will never know how much pain and hurt, there is
burning inside my flesh.
You will never know how much pain and hurt, there is
burning inside my flesh.
You will never know how much pain and hurt, there is
burning inside my flesh.
These feelings have knocked me cold,
These feelings have knocked me cold.
But where now'Where to hide?
But where now'Where to hide?
You will never know how much pain and hurt, there is
burning inside my flesh.
You will never know how much pain and hurt, there is
burning inside my flesh
