### "Nova Armada"

He travelled far, jumping across perceptions, he lost  
his way  
Something's not right, a potent conjuration gathers his  
strength and throws it into a black hole  
Stars will fall tonight, never to return

And do you want this? Do you really want this?  
If so, consider it done  
Ten gold coins for resilience and adversity all at your  
disposal  
It is not my fault, it is not your fault, it isn't anyone's  
fault  
These things happen to the best of us

Warships unite, rally the troops into position, take no  
prisoners  
On my command we will bombard this addiction with all  
we've got  
But baby, heart attacks, they will not stop me tonight  
Because I don't love myself enough to care but I love  
her

And do you want this? Do you really want this?  
If so, consider it done  
Ten gold coins for resilience and adversity all at your  
disposal  
It is not my fault, it is not your fault, it isn't anyone's  
fault  
These things happen to the best of us

And do you want this? Do you really want this?  
If so, consider it done  
Ten gold coins for resilience and adversity all at your  
disposal  
It is not my fault, it is not your fault, it isn't anyone's  
fault  
These things happen to the best of us
