

## Inme "Turbulence"

Visit "[Turbulence](#)" on MotoLyrics.com

Look up and see the sky tonight it's beautiful  
(Turbulence, turbulence)  
Make sure that you look up tonight and see it all  
(Turbulence, turbulence)  
The stars across the fire and through the clouds

There's no need to be afraid anymore

With just enough time for one more song  
When I wake up you're gone  
To know you were mine was enough  
And don't be scared

My friend who I depend on was always around  
(Turbulence, turbulence)  
My friend she is singing a perfect sound

There's no need to be afraid anymore

With just enough time for one more song

When I wake up you're gone  
To know you were mine was enough  
And don't be scared

You've got all that I need, your making my heart bleed  
The sun ignored me until now, just lie here with me  
Your eyes they hypnotize me every night I'm in a dream  
Just lie here with me, just lie here with me

With just enough time for one more song  
When I wake up you're gone  
To know you were mine was enough  
And don't be scared

There's no time for one last song  
You took it away, and now it's all gone
