Forbidden thoughts running deep within me
I imagine us together and free
Is this right?
The choice or the plan? A translator inside...
Yes or no in every second of time
No one knows their names but we know their number
And it's up...
Locked here in silence....far from sound
Forbidden truths still to be found
They're running loose within me
These dreams and memories of being free

I imagine a life without weapons & companies....
I know it's wrong....
I know we must murder all threats to us and bury the
evidence....
Bury the evidence....
Bury the evidence....
Arm in arm we will bury the evidence Us together and
free Is this right?
This is right.
