

Inner Surge "The Outcome"

Visit "[The Outcome](#)" on MotoLyrics.com

A secret born of mischief reveals itself
The pain & the sickness
The horror that we felt
It was forced on us
What use is complacency?
We need new communication
Right now

It's not our fault

The sound of sirens fills the sky
Are you ready to set fire to the past and come alive?

Resistance for a price
Resistance for a change
Underground, this way
So long it's been
Never thought I'd see your face again

It's not our fault

The sound of silence fills the sky
Are you ready to set fire to the past and come alive?
So be it

The outcome has changed
