"Welcome To The 5Th World"

Surprise!
You're involved and responsible
All the horror you see
All the scars that still bleed
All the waves in the sea
Are calling
When you're dreaming their dream
You're falling

Pull the pin
Nothing can stop this
The elements...
The elements are novice

4 worlds gone
Long forgotten
Ladies and gentlemen
We are in transition

The pictures in the magazines
The fictionalized history
Don't you think it's time to come clean?
(Why don't you) Say what you mean?

Smile for the monitor screen
You're caught reinforcing a dream
The face that suits you best you've never seen

Welcome
We've been waiting for you
