God is all you need they say  
No money, lust or greed  
But how can I believe  
In something I've never seen  
Roman Catholic priests we trust  
Thank god for little boys  
But they are being raped  
Just to cure their erotic joy  
Evangelists across the states  
Are making elders poors  
Hungry sick and penniless  
Just to get through heaven's door  
We are being taught  
Religion is the only way

That may be true to you  
Believe in yourself  
what can you do  
On your knees and pray  
For he is watching your sins confess  
The Arabs and Muslims  
are fighting in Lebanon  
They are gods people  
Soon there will be none  
It's time for all you people  
to start thinking for yourselves  
The mind is a terrible thing to waste  
Put that book back on the shelf
