Another Autumn

Will you walk out with me
I've been wishing for this saved dance
I don't know why we're running unexpected
This is altogether really, altogether too much sitting
Another autumn, another autumn, another autumn,
another autumn this year
Will you walk out with me
See the world I recognize
I mend the walls come detached but some how are
comforting
All together everyone, all together everybody
Another autumn, another autumn, another autumn,
another autumn this year
We throw our arms up and we get high
Higher dancing dizzy circles by the stream and I look at
them

To say happy all of this, say how, never mind
Come and take the holy spirit, shout to the Lord in this
big sky

And we walk out and we play a guessing game
Of houses whom race the night and pumpkin lights and
the heaven sent me
All together everyone, all together everybody
Another autumn, another autumn, another autumn,
another autumn this year
All together everyone, all together everybody
Another autumn, another autumn, another autumn,
another autumn this year
Another autumn, another autumn, another autumn,
another autumn this year
