He Said

=====

I never said those words
I'm going up that mountain now
Let earth go away, let cold wind blow
Because I cannot save them now
And this is my regret
That's coming down all over me
It drinks to drown in words in seas
But it only makes them rule again

[1st version chorus]: Go away, go away, go away I said
Go away, go away, go away I'm trying to sleep
Go away, go away, go away I said
[2nd version chorus]: I wish your mountains
I wish your mountains were gone

I wish you'd go, I wish you'd go
I used to think that there were other worlds

But I'm the only one that he said
So they are only in my head again...only

I have these words that are so hard
that I am working all the day
In everything I come to say
I build a shadow of him

He is afraid again
He says he is afraid again
It's coming down in tears of rain
And it will make them rule again
I spend my life in the worries he said
?

[1st version chorus]

[2nd version chorus]
