I feel so glad when you're by my side  
When you touch my heart with your smile  
Keep me warm with your smile when the winter comes  
Don't want anything but you by my side  
Gonna hold you whenever you want me to  
Hold you tight till the night comes  
Say that you love me, say it thousand times  
Don't ever let the wind blow this feeling  
I will keep you satisfied  
Oh the sky is so bright when the sun shines  
Gonna make you comfort all the time  
Together we can make it through the night
