"To Know The Unknown"

Visit "[To Know The Unknown](#)" on MotoLyrics.com

(first verse)

How the universe began?
What the futures hold?
Why do fools fall in love?
What happens to our souls?
Clues to life's mysteries are what we hope to find
Always reaching for a reason, searching for a sign

(chorus)

To know the unknown (Doesn't mean that much to me)
To know the unknown (Some secrets are just meant to be)
Don't want all the answers
Cause one thing is true
As long as my heart beats, I'll always love you
So I don't need to know the unknown

(second verse)

Is there a life on other planet?
Where's the magic in a kiss?
What do dreams really mean?
Who hears us when we wish?
Everybody's wondering, trying to understand
When all the revelations are castles in the sand

(chorus)

To know the unknown (Doesn't mean that much to me)
To know the unknown (Some secrets are just meant to be)
I don't need all the answers
Cause one thing is true
As long as the Earth turns, I'll always love you

To know the unknown (Doesn't mean that much to me)
To know the unknown (Some secrets are just meant to be)
I don't need all the answers
Cause one thing is true
As long as the Earth turns, I'll always love you, you,
you, you.

(third verse)

You don't have to tell me just why you went away
Now that you've come back, there's nothing more to
say
All I need to know is that you're here to stay

(chorus)

To know the unknown (Doesn't mean that much to me)
To know the unknown (Some secrets are just meant to
be)
Don't need all the answers
Cause one thing is true
As long as my heart beats, I'll always love you

To know the unknown (Doesn't mean that much to me)
To know the unknown (Some secrets are just meant to
be)
Don't need all the answers
Cause one thing is true
As long as the Earth turns, I'll always love you
So I don't need to know the unknown
