(PT Lauren)

Look now and you'll waste the day
And I won't see through your heart anyway
We'll shake hands and we'll crawl again
And I really think you are my friend
And when you scream like hell
I will burn your eyes : Can't watch me as I tell
Something old , very well
Now I know why I'm in knots:
I covered everything with dots
That come and go as they please
Don't look at these
Right now this is real

And just 'cause I forgot to feel
And here I am on my knees
Don't look at these
Wake up and hate today
And I have to knock you out 'til may
Brainwashed and delirious I am:
The only thing that I'd like save
So if you know my name
It is comforting to know that we are the same:
When the jig is up we are lame
