Within all the dark
I can see the light
In the coldest caverns
Through the blackest night

It likes to strangle me
Loves when I'm shivering
Even how hard it tries
I will keep on believing

Time will take its time
I'll move far along
Darkness to heavens
It won't be too long

Through life and time
To a heart's content
I know you can make it
Keep believing within

Life is for living
Life can be deceiving
Even how hard it tries
I will keep on believing

Time will take its time
I'll move far along
Darkness to heavens
It won't be too long
When life gets you down
Forced to your knees
Just remember me
Remember me please

I know that sometimes
Everything seems wrong
Just keep in mind
This won't take too long
