If I never ever ever get to see you again  
Remember it was you that made me smile  
You satisfy the need you created  
Not for the first time could be for real

And in times of desperation when I needed a friend  
Remember it was you that made it all worthwhile  
I sometimes try to fake hesitation  
Not for the first time I've started to feel

Straight straight through my heart those arrows fly  
Straight straight through my heart and that's no lie

I don't want to play the innocent you know me too well  
You still keep me wondering but I don't know why  
You satisfy the need you created  
And for the first time I feel so real

Straight straight through my heart those arrows fly

Straight straight through my heart and that's no lie  
Wait wait for me please don't pass me by  
If this world's without you I'd surely die  
I'm in the middle of a love without an end  
Reality too easy to comprehend

*[Solo]*

Straight straight through my heart those arrows fly  
Straight straight through my heart and that's no lie  
Wait wait for me please don't pass me by  
If this world's without you I'd surely die  
I'm in the middle of a love without an end  
Reality too easy to comprehend

Kono yono nani yori ichiban daisuki yo  
Remember it was you that made me smile
