And now it's time to leave the lights  
And hope the future is just as bright  
Please think of me back home  
I'm so so close

I planted all my songs with seeds  
In hopes that they would be, my escape  
From home  
We've made our memory machines  
And you push me to succeed  
I won't be gone for  
For long

I'm more than just a product  
I'm not a clever line you thought of  
You've got to save that for someone who cares

And now it's time to leave the lights  
And hope the future is just as bright  
Please think of me back home  
I'm so so close  
And even though I'm so far gone  
Know that I wrote out one last song  
A piece of me to hold  
I'm so so close  
We are so so close

Come and take a walk with me  
We'll slither up my sleeves  
This isn't lost  
This is in love  
Months of miles away from dreams  
We're swallowing the seed  
This love tells no one

I'm more than just a product  
I'm not a clever line you thought of  
You have to save that for someone who cares

And now it's time to leave the lights  
And hope the future is just as bright

Please think of me back home  
I'm so so close  
And even though I'm so far gone  
Know that I wrote out one last song  
A piece of me to hold  
I'm so so close  
We are so so close

Don't don't don't don't you want to be  
Don't don't don't don't you want to be  
Don't don't don't don't you want to be  
So so close to me [x2]

And now it's time to leave the lights  
And hope the future is just as bright  
Please think of me back home  
I'm so so close  
And even though I'm so far gone  
Know that I wrote out one last song  
A piece of me to hold  
I'm so so close  
We are so so close
