A timeless farewell to whats already been said  
You can hang your pride but not your head  
Always fighting, almost breaking  
Faith is lost, youth is fading

Stuck on repeat  
Letting you down  
Stuck on repeat  
Well die in this town

This is not the way it ends  
Well carry on if its with or without you

Closing your wounds needle and thread  
Were taking chances with what we have left  
But the deepest cuts will never mend  
Your life fell short where my life began

This is where my life begins  
Erase my face from pictures and  
I wont share the memories

This is not the way it fucking ends
