Peel away the fire from the sun
Close your eyes and see sometimes
But I really really feel the sun no shine bright
I really really see no one to hold tight
And I'm singing
Fly away, float around the milkyway miles away
In the high sky I'm singing
Fly away float around the milky way miles away
In the high sky I'm feelin fine
Steal away the beauty of the grave
I am frozen and polluted sometimes
I really really feel the sun no shine bright
I really really see no one to hold tight
And I'm singing
Fly away, float around the milkyway miles away
In the high sky I'm singing
Fly away, float around the milkway miles away
In the high sky I'm feeling fine, fine, fine, fine
I'm feeling fine
But I really really feel the shine no shine bright
And I really really see no one to hold tight
And I'm singing
Fly away, float around the milkyway miles away
In the high sky I'm singing, fly away
Float around the milkyway miles away
In the high I'm singing
