Creeping out of the darkness  
I've never felt like this before  
Felling something I can't explain  
Like no other time before  
It's taken over control of me  
Sends me spinning in my mind  
One and one makes three  
Have I crossed over that line

On the edge of insanity  
Something's starting to unwind  
In the name of humanity  
Take a closer look inside

All that we dream  
All that we feel  
Makes this all so real  
All that has been  
All that we've seen  
A never ending wheel  
It goes on and on and on

All alone all by myself  
In this room now full of fears  
Something's calling out haunting me  
It's all starting to come clear  
Motionless I cannot run  
Magnetizing draws me near  
Hypnotizing in slow motion  
Is this reality right here

On the edge of insanity  
Something's starting to unwind  
In the name of humanity  
Take a closer look inside

All that we dream
