sometimes I wonder what went wrong
do I even belong here at all no
where am I how did I get here
wale me up from this nightmare
I don't deserve this no one does

and then he stared into the sky
feeding his fright denying
feeling the pain hear the screaming
I don't want to die

clear my mind
so many times I've tried I've failed
so many people slaughtered
don't they have a conscience

slaves brainwashed to be that way

the darkness clouds I can't see
will I see my family
they pray
would they die for me
bury me
