Medicate the mind  
Recover and Evaluate  
Pills swallowed  
Sleep sets in  
Enter the other side

Splintered visions  
Brought on by your mind  
Splintered visions  
Believing the lies

Recollection thoughts.  
Trying to understand.  
One more pill to sedate.  
Diminishing the pain.

Splintered visions  
Brought on by your mind.  
Splintered visions  
Believing the lies

You're running forever  
Getting nowhere  
Changing routes takes you back to the beginning  
Falling down  
Hit the wall

Splintered visions

You're running forever  
Getting nowhere  
Changing routes takes you back to the beginning  
Falling down Hit the wall  
Hit the wall
