If you say something to me
And you mean, you mean what you say
And you're wanting my attention
There's a game you must play

Body language
Body language
Body language
Body language yo o o o o

Use your eyes and your face
Words have no place
Move your body in a way
That I will know what you say

Body language
Body language
Body language
Body language yo o o o o

If you say something to me
And you mean, you mean what you say
And you're wanting my attention
There's a game you must play

Body language
Body language
Body language
Body language
Body language
Body language
Body language
Body language
