I asked you a question  
I didn't need you to reply  
Is it getting heavy?  
And then realize  
It's getting heavy  
Well I thought it was already as heavy as can be

Is it overwhelming  
To use a crane to crush a fly?  
It's a good time for Superman  
To lift the sun into the sky  
Cause it's getting heavy  
Well I thought it was already as heavy as can be

Tell everybody  
Waiting for Superman  
That they should try to  
Hold on the best they can  
He hasn't dropped them, forgot them or anything  
It's just too heavy for Superman to lift
