The smell of blood - the smell of pain  
Will unleash the beast in chain  
Come as knight and return as king  
Dragonheart the chosen one to bring

As written in the prophecies  
A hard quest to the fire breeze  
A new king will seize the day  
Fall in battle or dragon slay

Marching across the fields  
Like an army made of steel  
Holding high our shields  
As we engage the beast of rage

Flames in the night the dragon we fight  
One by one men will fall  
Flames in the night blood brothers unite  
Fire from the dark in flames right from the start  
Dragonheart

If you claim the land the throne  
Face the creature of steel and bones  
Bring back the price for the crown  
Every soldier will hail and kneel down

Marching across the fields  
Like an army made of steel  
Holding high our shields  
As we engage the beast of rage

Flames in the night the dragon we fight  
One by one men will fall  
Flames in the night blood brothers unite  
Fire from the dark in flames right from the start  
Dragonheart

Through the lands  
Through the forest  
I got my sword - I must be brave  
Over the hills

The horizon is calling my name  
I guide the flame

I fight the beast  
I fight the trolls  
I smash the skulls  
Of the goblins that stand in my way  
No wizard spell can stop me

The price is high  
But glory will be mine  
Marching across the fields  
Like an army made of steel  
Holding high our shields  
As we engage the beast of rage

Flames in the night the dragon we fight  
One by one men will fall  
Flames in the night blood brothers unite  
Fire from the dark in flames right from the start  
Dragonheart

Flames in the night the dragon we fight  
One by one men will fall  
Flames in the night blood brothers unite  
Fire from the dark in flames right from the start  
Dragonheart
