### "Follow The Sign"

Visit "[Follow The Sign](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Just like the road that leads to nowhere  
Riding the time like there is no tomorrow  
Obey the voice that speaks from the inside  
Through the darkness and into the light

From the shadows and the underground  
From the dungeon faith is rising  
The spell is broken and the curse is gone  
A deadly omen back from the past  
The clock is ticking ~½ end of the hourglass  
Time for justice, now it's payback  
It's the calling and the gathering  
Dawn of glory ~½ no fear nation

The ghost of failure is dead and gone with the wind  
Guardian angel spread your wings and fly away

Just follow the sign  
Through fire and water  
Follow the sign

Follow me

Like an arrow through the thunderstone  
In lightning heaven just like lightning  
See it coming, with the speed of sound  
In the moment a free spirit

The ghost of failure is dead and gone with the wind  
Guardian angel spread your wings and fly away

Just follow the sign  
Through fire and water  
Follow the sign  
Through pain and slaughter  
Metal is rising here tonight  
Metal is rising you see the light

The crusade that never dies  
Is been here since the dawn of time  
Metal troops you can defy

The time is right here tonight

The crusade that never dies  
Is been here since the dawn of time  
Metal troops you can defy  
The time is right here tonight

Just like the road that leads to nowhere  
Riding the time like there is no tomorrow  
Obey the voice that speaks from the inside  
Through the darkness and into the light

And fly away

Just follow the sign  
Through fire and water  
Follow the sign  
Through pain and slaughter  
Metal is rising here tonight  
Metal is rising you see the light

Metal is rising
